

# Soft Computing Applications in Industry and Consumer Fields

Hiroshi Nakajima, Ph.D.  
Senior Technology Specialist  
Omron Corporation  
nak@ari.ncl.omron.co.jp

## Abstract

In this lecture, soft computing technology and its applications used in industry and consumer fields are introduced. Besides on the technical contents, what are the benefits of the application will be especially focused on. The applications will cover wide area from manufacturing equipments to home appliances such as follows;

- Automated Sensory Inspection Systems
- Energy Management System
- Manufacturing Equipment Management System
- Medical Applications
