

## **Post-Doctoral Position in Medical Robotics, Shanghai Jiao Tong University, China.**

### Research Direction:

Precision electromechanical systems, intelligent human-computer interaction, image navigation intervention, surgical robots, rehabilitation assistant robots, bio-optics, and other related areas.

### Qualifications:

1. The candidate must have a graduate degree and have obtained a doctoral degree from a well-known university or research institution at home and abroad in the past 3 years (no more than 35 years old).
2. The candidate has published high-level research papers in related fields or has good research and development capabilities.

### Responsibilities:

1. Engage in scientific research, actively organize and undertake national, provincial and ministerial-level scientific and technological projects, make internationally-advanced landmark scientific and technological achievements, and publish high-level academic papers;
2. Actively promote the application of research results and technologies;
3. Participate in the construction of the institute and other social service work.

### Compensation package:

The annual salary (including house-renting allowances) is not less than 242,000 with separate performance-based bonus;

Outstanding post-doctoral staff could apply for long-term teaching positions when the contract is terminated if they met related requirements;

The “Morning Star Post-Doctoral Incentive Program” will be set up. Candidates included in this program will get a 40,000 increase for their annual salary and have the priority to be selected into the long-term teaching track;

Encourage the application for talent projects, research funds; encourage international cooperation and participation in international conferences;

Encourage and assist in applying for the National Postdoctoral Innovation Program and the Shanghai

### Super Postdoctoral Program;

Other post-doctoral benefits as prescribed by Shanghai Jiao Tong University.

### Other information:

Please apply online and send the application materials to the contact person's email address with the subject of “Apply for the Postdoctoral Position of Medical Robotics Research Institute + Name”.

Application materials: 1. Personal resume (including personal information such as date of birth and contact information); 2. A list of your published papers and 5 pieces of representative works (full text); 3. Main job performance; 4. Two pieces of recommendation letter.
