

IEEE Tech4Good Funding Opportunity

The IEEE Humanitarian Technologies Board (HTB) inspires and empowers IEEE volunteers around the world carrying out and supporting impactful humanitarian technology activities at the local level. Its [IEEE Tech4Good program](#) offers funding opportunities to support grassroots technological projects, led by IEEE members, that address local challenges related to sustainable development.

Applications may be submitted using the [Online Funding Opportunities Portal](#) through **31 March 2024** and will be reviewed on a rolling basis. We encourage applicants to submit their proposals as soon as they can.

Potential applicants are encouraged to visit the [HTB website](#) to see the technology impact categories, the funding specifications, evaluation criteria and the detailed Call for Proposals. There is also a blank application form available to help with planning and preparation. For any questions about the suitability of your proposal, or for promotional materials to share with your Chapter or Student Branch, please write to tech4good@ieee.org.
