

Scholarship Opportunities in AI Applied to Cybersecurity

We are currently seeking applicants for **two scholarships in cybersecurity**:

- **Information Integrity** (e.g., Combating Misinformation, Fake News)
- **Voice Biometrics** (e.g., Speaker verification robustness, voice anti-spoofing, voice conversion)

These projects aim to push the boundaries of knowledge in data privacy, information integrity, and voice biometrics.

Ideal Candidate Profile

We are looking for motivated and skilled candidates with a strong background in machine learning (particularly deep learning).

Qualifications

- Strong academic record with high-quality publications.
- Master's degree in Computer Science, Computer Engineering, Electrical Engineering, Mathematics, or a related field.
- Proficiency in Python.
- Energetic, self-motivated individuals with a passion for research and producing new knowledge.

Application Process

If you are interested, please send your CV, including a list of publications, to anderson.avila@inrs.ca.

INRS

The Institut national de la recherche scientifique (INRS) is the research-oriented branch of the University of Quebec. The institute offers training for graduate and postgraduate studies in four thematic research centres located in Montréal, Quebec City, Laval and Varennes. At INRS, the Énergie Matériaux Télécommunications Research Centre brings together a number of world-renowned telecommunications experts who specialize in the development of digital technologies and other fields. It hosts nearly 800 students and postdoctoral fellows.
